

ANNITOR CONSULTING and ANNITOR GEST offer expert advice since 1989 in renewable energy.

RENEWABLE ENERGY FOR A BETTER FUTURE

PROPOSAL

- **PHOTOVOLTAIC SYSTEM IN BUILDING**

- **WIND SYSTEM**

- **THERMAL SOLAR SYSTEM**

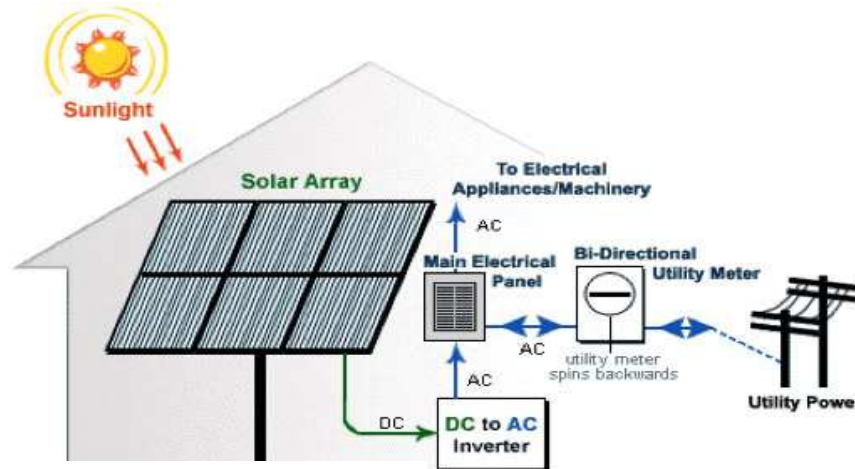

- **ENERGY EFFICIENCY**

- **SUSTAINABLE MOBILITY**

PHOTOVOLTAIC SYSTEM

PV modules convert the solar radiation into continue current, after an inverter convert the energy DC into energy AC.

PHOTOVOLTAIC SYSTEM IN BUILDING

Integration of photovoltaic systems in buildings
(home, government, industry, companies, ecc..)

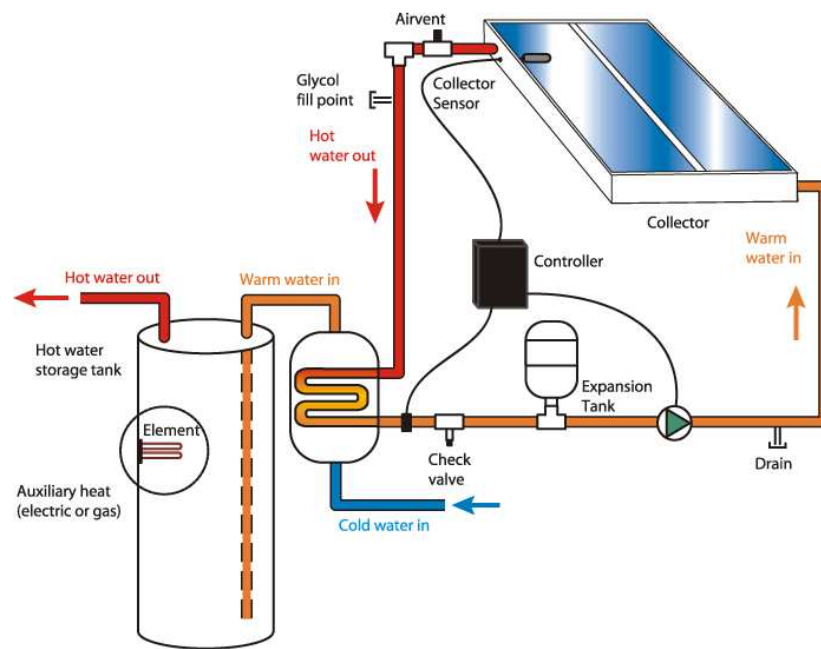

PHOTOVOLTAIC PLANT

THERMAL SOLAR SYSTEM

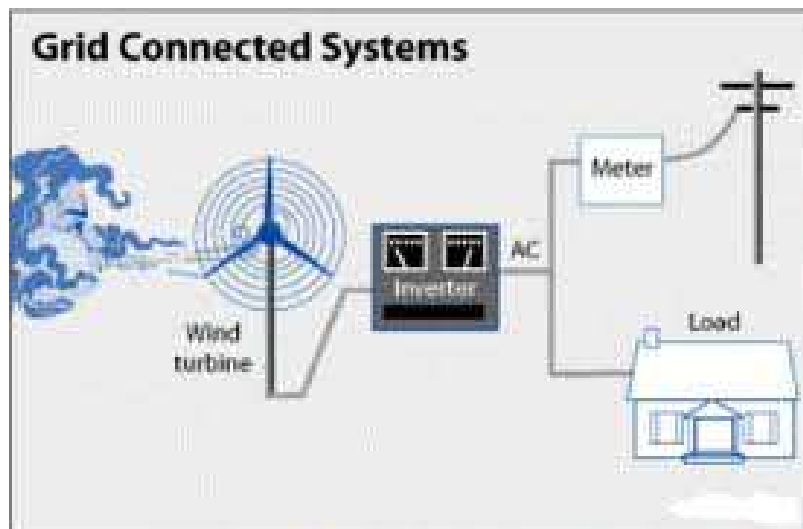

Solar modules convert the solar radiation into thermal energy.

Active Indirect System

WIND SYSTEM

The wind turbine converts wind energy into electrical energy.

ENERGY EFFICIENCY

Reduction in fuel consumption and reduction of energy costs of buildings (house, companies, industry, ecc..)

- Photovoltaic system
- Thermal solar system
- Wall insulation
- Reducing water flow
- Efficient appliances
- LED lamps
- ecc...

SUSTAINABLE MOBILITY

- Electric Vehicle (scooter, city car, city bus)
- Electric Vehicle charging infrastructure
- Application: parking, taxi, companies, public transport
- Integration photovoltaic system with charge point
- Car sharing

Thanks for your attention
